Materials	1.83%
Real estate	0.65%
BND	3.8%
Cash	8.68%
Derivative	3.12%
Total	100%

Management Commentary;

Negatives: The fund continued to experience headwinds this month due to uncertainty of the consequences of tariffs with the US closest trading partners and due to the strength of the U.S.D. Positions that are USD-denominated but primarily generate revenue in a currency other than USD have experienced a drop in share price over the previous months. Opportunistic purchases has reduced the cash position to 8.7% down from 10.97% and has raised the portfolios Beta slightly to 1. Despite the dividend interest rate increasing it remains slightly under the target rate of 2.52% for March. We underperformed the SPX by 0.45% for the month of February. Despite impressive quarters for the semi-conductor industry our core portfolio holdings experienced headwinds. We expect these changes to be transitory and correct over the coming months..

Positives: We continue to outperform the SP500 for the year and since the start of reporting by 7.4%. Since inception we have consistently beat the index, paid a higher dividend and having a lower Beta despite the aforementioned headwinds. We have 8.69% cash reserves ready to take advantage of opportunities and volatility this year. The notable changes this month include; cash decreasing by 20.78%, Mid Cap holding -28.42%, Consumer Defensive -15.3%, Industrials +15.3% & Consumer Cyclical +17.71%. We started new positions in out of favour Tesla as we consider the pull-back over done and once the hype and the drama created by the protestors subsides the underlying company remains the same. We reduced some small cap Bio-Pharma companies and reduced our position in EL. We have very little exposure to China (except BIDU), Canada (SU) or Mexico (STZ), and so do not expect to be disproportionately disadvantaged by President Trumps’ tariffs. The overall volatility of the fund remains constant with a Beta of 1 and our dividend improved to 2.29% greater than the SP500’s 1.26%.

Conclusion: We are somewhat disappointed with the funds slight miss this month but can report that we have recovered those losses in the first week of March. Having added to quality positions last month I remain confident about the fund's continued success.

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. All investments involve the possibility of profit and the risk of loss, including the loss of principal. This document does not constitute an offer to sell or the solicitation of an offer to purchase any security or investment product. All information is current as of the date hereof and is subject to change in the future.

- (1) Performance results are presented on a net-of-fee basis. Net returns reflect the deduction of, among other expenses, management fees, brokerage commissions and administrative fees, and include the receipt or reinvestment of all dividends, interest, and capital gains from our underlying portfolio companies. Parallel Tangent Capital (the“Company”) is not a Public Company and is structured as a private investment fund. The Net Asset Value ("NAV")per share is calculated using a constant formula to assist the reader in understanding the Net returns generated by the company and the NAV of the fund. The author believes this is an accurate representation of the performance of the Company. Depending on the timing of an individual investor’s specific investment, net performance for an investor may vary from the net performance as stated herein. Performance data and other information contained herein are unaudited but the author has undertaken to ensure the information is accurate except where decimal rounding is used. Performance is based on the dollar return for the specific period, including any dividend, interest or bond payments received by the Company, calculated from the beginning to the end of such period on a non-accrual basis, the aforementioned is only recorded upon receipt of payment.
- (2) For the purpose of determining the equity and debt exposures, investments are valued based on stock price after the market closes on the last day of the month, should the market be closed on this date, the close price on the previous trading day will be used.
- (3) Large Cap is defined by companies with a Market Capitalisation of greater than \$5 Billion, Mid Cap is defined by companies with a Market Capitalisation of no greater than \$5 Billion but greater than \$1 Billion and Small Cap is defined by companies with a Market Capitalisation less than \$1 Billion.
- (4) Portfolio composition is calculated using the publicly disclosed sector allocation for each holding as of the date of this report. A position in an issuer is only assigned to a sector once it has been publicly disclosed.
- (5) Where the Company holds shares in an ETF or a Publicly Traded Investment Holding Company, given the complex composition of those holdings it is not possible for the percentage allocated per sector to be valued precisely, therefore the combined value of these positions has been pro-rated based on the SP500 sector composition. These will be recalculated in January each year. For any ETF holding using the NSDAQ 100 or similar as its benchmark, given its Tech sector bias, the full amount has been allocated to the Tech percentage of the Company composition. The company may provide weightings for any ETF or similar upon request and no assumptions should be made regarding the weighting in the sector allocation.
